

Morphing

From my experience, it appears that the Grey ETs are able to take on a wide variety of shapes and false appearances. I personally have witnessed the grays morphing into Police and Military helicopters, US post-office letterboxes, Light-posts and Squirrels. So far I have been unable to caught them on video in the act of morphing. But somewhere in my records I did catch a Grey shortly "after" it morphed into squirrel. All around the squirrel was a purplish glow. The squirrel used telepathy to speak with me after morphing. It was a stressful learning experience. To this day I still have my doubts about this experience. On another occasion, I once ran into an totally Human looking ET at my doctors office. This ET worked for one of the big drug companies and was giving out free samples of new products. Because of my etheric training, meditation and genetic manipulation I can sense the aurora around the human body. I am familiar with the lower Prana forces that psychic surgeons use to heal the body. When an ET crosses my path I can see and feel the difference in their colors. Most of the time we can talk telepathically. Sometimes this is forbidden. In the early days of my ET orientation I experienced many stressful contact events that pushed the envelope of sane cognition. If you see an ET driving a car with colored headlights that are not common, and if the windows are totally blacked out, If something seem very odd, chances are it is not human driver. This behavior seems to mirror college student behavior. The kids like to blacken out the windows and use colored headlights on the new cars. My daughter has had way too my contact experience of this sort. She is a much better authority on this subject than I am. The car will look like a normal car on the outside, but if they roll their windows down and let you see into the car you'll quickly discover a vast array of very colorful instruments. When a human try's to look into the car with the windows rolled down the only thing they'll see in the pitch black interior is the Human looking ET driver being lit up by the colorful glowing controls. The controls do not look like the kind you find in a normal car. My daughter says it really challenges her sense of reality. I've seen these sorts of cars on the road but have never been given the opportunity to look inside. My best guess is that currently there are about 1000 ETs drivers embedded in our central ohio community. There seem to be a small community of ETs living in the Heath Ohio area. I am uncertain if our government is aware of this. Weather or not there is a treaty in place I do not know. I am informed that some of the ET community are from our future. Others, which have a slight orange skin like Donald Trump are not on our time line. These slight orange skinned ET seem to be from Andromeda galaxy.
